

# PRODUCTION INTELLIGENCE SOLUTIONS

## PRODUCTION OPERATIONS GAME CHANGERS

Developed by artificial lift experts & leading data scientists, the Production Intelligence Solutions offer everything you need to manage by exception and reap the benefits of running a digital oilfield on our software now, without the use of proprietary hardware.

### LOWER OPERATING COSTS AND INCREASE PRODUCTION

You're already working hard to lower operating expenses and increase production. Lower your break-even cost per barrel by enabling full-field well management across any data source and implementing machine learning-powered well optimization and predictive event detection.

#### QUICK TIME TO VALUE

Production Intelligence delivers value to organizations with no additional capital expenditures. From the time your data is ingested, you'll start to see increased effectiveness, production and profitability, while also reducing premature failures, suboptimal operations and capital expenditures.

#### TURN YOUR DATA INTO PROFITABLE ACTION

What's already happened is too late. Use Production Intelligence to gain real-time visibility into the state of your wells to discover causes of suboptimal operation and failures and give operators valuable time to take decisive action.

#### ONE TOOL ONE TRAINING

Our Production Intelligence Dashboard (formerly OspreyVision) features configurable dashboards, lift-specific visualizations, centralized file storage, and collaboration tools to access files and make comments. It's the only tool you'll need and it can be accessed from any web browser.

#### GAIN BACK VALUABLE OPERATIONS TIME

Production Intelligence vastly reduces the time engineers need to monitor wells by providing a centralized monitoring source. Lift Intelligence also surfaces evolving problems to them and automates repetitive well monitoring tasks, putting hours back into their days to fix underlying issues and optimize performance.

## OUR SCALABLE SOLUTIONS WILL LOWER LOE AND INCREASE FCF

With their expert-developed data science models and real-time data visualizations, our solutions improve your production and prevent unnecessary suboptimal conditions and downtime.

### Production **UNIFIED MONITORING**

**ACHIEVE FULL-FIELD WELL  
MANAGEMENT IN ONE PLACE**

- ✓ Import data from any source and view in one place
- ✓ Powerful reporting, logging and collaboration tools
- ✓ Set alarms and trigger workflows and tasks

### Production **ANALYTICS**

**AUTOMATED FULL-FIELD WELL  
OPTIMIZATION AND EVENT  
DETECTION DIAGNOSIS**

- ✓ Automated well optimization
- ✓ Event diagnostics with leading indicators
- ✓ Powered by Expert-Guided Machine Learning

## GIVE US JUST A GROUPING OF WELLS

Let us show you how we can make your make your production operations more efficient. Contact our sales team today to get started.
